

#### **E. Permit Openings**

The permit may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Revisions must be made to this permit to incorporate applicable standards and regulations adopted and shall be treated as a permit renewal.

The permit may be reopened or revised if the department makes a determination that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

The permit may be reopened or revised if the department determines that the permit must be revised or revoked to assure compliance by the source with the applicable requirements.

Other conditions to be specified for each particular facility.

---

#### **F. Inspection of Premises, Records, Equipment, Methods and Discharges**

Upon presentation of proper credentials, the permittee shall allow the director or the director's authorized representative to:

1. Enter upon the permittee's premises where a source is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;
  2. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;
  3. Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
  4. Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or other applicable requirements.
- 

#### **G. Departmental Review**

This permit is issued based on information submitted by the applicant. Any misinformation, false statements or misrepresentations by the applicant shall cause this permit to be void.

No review has been undertaken on the engineering aspects of the equipment or control other than the potential of that equipment for reducing air contaminant emissions.

---

#### **H. Severability**

The provisions of this permit are severable and if any circumstance is found to be invalid by this department or a court of law, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected by such finding.
